Innovative of water hyacinth and garbage collecting machine

Innovative of water hyacinth and garbage collecting machine

A close-up photograph of a tree branch covered in vibrant green moss. The branch is the central focus, with its texture and the intricate details of the moss clearly visible. The background is softly blurred, showing more of the tree and a bright, hazy light source, possibly the sun, creating a warm and natural atmosphere. A semi-transparent white rectangular overlay is positioned over the center of the image, serving as a background for the text.

Thank you
